

#### Standard Features:

- **Tilted Rack:** Ensures proper jogging of smaller stacks.
- **Variable Speed:** Up to 3,600 vibrations per second.
- **Rheostat Control:** Adjusts the amplitude of vibration to match the grade and size of paper or forms.

Virtually any piece of equipment which processes cut-sheet paper or forms can be enhanced by using the FD 400 jogger. The FD 400 will align and separate forms or paper for proper feeding while reducing static electricity. The tilted bin ensures that smaller stacks can be jogged without falling over.
