The PS100, our most popular folder sealer, is the ultimate compact machine for small to medium volume processing of one-piece mailers. Print your documents on pressure seal paper, put them into the PS100 and press a button. Moments later your documents will be folded and sealed, ready for mailing.

The PS100 folds and seals your forms at up to 4,000 forms per hour. It can handle all folds and a variety of form sizes. Paper flow is electronically monitored and the system will automatically shut down in the event of interruption. You can immediately begin operations without disrupting document sequence or count. In addition, an out feed counter is a standard feature, to allow easy calculation of processed documents. Ease of operation and the quality of the seal achieved using the PS100 is unparalleled. This is truly a "user-friendly" business solution.

Technical Specification
