The PS300 is the ideal system for processing medium to heavy volumes of single sheet documentation at a processing speed of 9,000 forms per hour.

Tabletop design allows for easy operation in a convenient office location. The PS300 will work with your existing impact or laser printer. It has standard large paper hopper and conveyer, reducing operator form handling. Paper flow is electronically monitored and the system will automatically shut down in the event of any interruption; operations can resume immediately without disrupting document sequence or count. In addition, an out feed counter is a standard feature, to allow easy calculation of processed documents.

Technical Specification

| | |
|----------------------|---|
| Processing speed | 9,000 forms per hour |
| Monthly Duty Cycle | 175,000 |
| Feeder capacity | 500 sheets |
