16 Kingston Road, Unit #8, Exeter NH 03833

The new PS400 mid range folder/sealer is ideal for the medium to large volume processing of one-piece mailers. Designed for an office environment with mail room quantities.

The PS400 will work with your existing impact or laser printer. By folding and sealing your forms at up to 12,000 forms per hour, the PS400 has standard large paper hopper and conveyer, reducing operator form handling. Paper flow is electronically monitored and the system will automatically shut down in the event of any interruption; operations can resume immediately without disrupting document sequence or count. In addition, an out feed counter is a standard feature, to allow easy calculation of processed documents.

## Technical Specification

Processing speed	12,000 forms per hour - variable speed
Monthly Duty Cycle	250,000
Feeder capacity	500 sheets
Form size	Width: 5-1/2" - 11-3/4" x Depth: 17"
